SKILLS

JavaScript
HTML
CSS
React
Node.js
Express
MongoDB
MySQL
Git
Agile
Bilingual (Spanish)

EDUCATION

B.S. Biology
Temple University
Philadelphia, PA
Graduated May 2021

PROJECTS

LinkDev:
- Developed a full stack social network application using MongoDB, Express, React, and Node. Features include data validation, http requests, state management, and hooks.
- Application to share posts/code and connect with other developers.

Linked List Visualizer:
- Developed a web application using React. Features include prop handling, mapping, hooks, and OOP.
- Education through visualization. Learn the methods of a linked list with an easy-to-use interface. Choose the method, arguments, color, and press run to observe how the linked list is mutated.

PokéSearch:
- Developed a web application using Vanilla JavaScript, HTML, and CSS. Features include generating HTML content, handling events, and external API calls.
- Search for Pokémons and receive information relating to its card, price, and stats.

EXPERIENCE

MTHREE - Front End Development
- Web Development, React, Node.js, MongoDB, GraphQL
- Develop MERN Stack applications while implementing Test Driven Development using Mocha and Chai

Our Lady of Lourdes Medical Center - IT
- Aided technicians with troubleshooting computer processes and rebooted/managed programs for handheld devices.

H&H Landscape Management - Irrigation Contractor
- Installed and maintained irrigation systems while troubleshooting and repairing irrigation components.
